

THE VOYAGER

WEST COAST STYLE INDIA PALE ALE

PROFILE

Bright citrus notes of tangerine and grapefruit are the showcase of this easy drinking IPA. Beneath the pronounced hop character, a restrained maltiness with notes of honey comes through as the brew finishes with a subtle bitterness.

The aim of a proper West Coast IPA is to strike a balance between a pronounced and flavorful hop profile, and keeping the beer easy-drinking. The hops selected are added late in the brewing process to avoid harsh bitterness, resulting in a bright, citrusy flavor. Filtered brilliantly clear, the body of the beer is full enough to hold up the hops but restrained enough to keep this beer our most popular offering since we opened our doors in 2014.

TASTING NOTES

Characterized by fairly intense hop aroma with big hits of tangerine and grapefruit, this brew also classically exhibits a sunset orange color with a rocky, tight head that holds together well.

Hop flavor comes through but is balanced with a medium malt sweetness and body. Touches of honey and crystal malts are added mostly for color plus background flavor. A slight, lingering hop finish rings true to the style as well.
